Dear Tim,

This is the first of a three part article. Part two lists the work you, Ram Dass and Metzner have done in the '70s, and part three will attempt to define, compare and reconcile your philosophies

Your Game of Life is a masterpiece. It may well be the foundation for a new psychology, as far beyond Freud as the new physics are beyond Einstein. I'm constantly awed by the caliber, style and wit of your writings and delight in your humorous understanding of the mammalian species that presently inhabits the earth. You seem to have an exceptionally clear pipeline to Cosmic Headquarters. I keep wondering: are you in touch with Higher Intelligence in your ordinary state of consciousness? Or don't you have "ordinary" states any more?

I must tell you that I feel ridiculously inadequate vis-a-vis your towering intellect. I felt quite foolish about my book proposal the last time I saw you. The Three Who Made a Revolution (tentative title) hopefully comes closer to what I wanted the book to get across. I'd greatly appreciate your comments and suggestions, if you can find the time.

I love California. The energy and the intelligence level here are invigorating. Have you found a way to stop and/or reverse the aging process yet?

Love,

Nina
